

TITLE 410 INDIANA STATE DEPARTMENT OF HEALTH

LSA Document #13-351

SUMMARY OF CHANGES BETWEEN PROPOSED RULE AND FINAL RULE

1. **Section 61(b)(2):** Added the word “or” at the end of subdivision (1). Replaced the wording of subdivision (2) with “Is a system component independent of the soil absorption field that meets the effluent quality requirements of NSF/ANSI for certification under Standard 40 as a Class I plant, and that is approved by the department under the provisions of section 52(h) of this rule.”

This change provides clarification as to what secondary treatment components may be used. It does not change the intent or the requirements of this section, as the requirements are already in section 68(h). This change in wording makes it easier for this department to cite this section of the rule without always having to go back and also cite section 68(h).

2. **Section 72(e)(5):** deleted the words “and during cleaning or exchange”

Changes proposed to allow for the use of additional filter technologies without compromising the primary purpose of the filters.

3. **Section 84(f):** added the words “or a sanitary tee,”

This is a change that must be made for consistency in the rule.
